

**Air Reps has unparalleled access to many of the world’s leading HVAC manufacturers and their unique technologies.**

<b>AAF FLANDERS</b>	Advanced filtration including extended media cartridges, HEPA, carbon, gas-phase BIBO and other specialty filter containment housings.
<b>ABSOLUTAIRE</b>	Custom direct fired industrial heaters and make-up air units.
<b>ADDISON</b>	Specializing in DOAS units both packaged and split. Conventional dx with gas heat or Heat Pump.
<b>AEGIS</b>	Reliable shaft grounding protection for large AC and DC motors.
<b>AIR<sub>2</sub>O</b>	Packaged rooftop indirect evaporative cooling units with heat pump, cooling only and gas heat options.
<b>ANNEXAIR</b>	Custom air handlers and packaged DX solutions, casing construction from recycled materials for up to 40% less unit weight.
<b>AQC BLUEDUCT</b>	Underground self insulated duct system that is durable and problem-free. Engineered to protect against corrosion, mold/mildew, radon, rust and air leaks.
<b>BACHARACH</b>	Advanced refrigerant monitoring for VRF systems and indoor chiller room applications.
<b>BALTIMORE AIRCOIL COMPANY</b>	Cooling towers, fluid coolers hybrid towers and ice storage systems.
<b>BASX</b>	Free cooling chillers, indoor cooling units, modular data centers, cleanroom solutions, operating room ceiling systems, custom air handlers, fan array retrofits and vertical self-contained systems, high efficiency data center cooling solutions including packaged indirect DX units, custom air handlers, and modular OR ceiling systems.
<b>BERNER INTERNATIONAL</b>	Architectural, commercial and industrial air doors and curtains.
<b>BLENDER PRODUCTS</b>	Static mixing technology to eliminate thermal stratification, nuisance freeze stat trips and frozen coils.
<b>BROAD USA</b>	Absorption chillers capable of providing hot and cold water generated from steam, solar, gas, diesel, recycled oil, biogas or waste heat energy.
<b>CGC</b>	Hybrid heat pumps in many configurations such as, vertical stack, classroom, console and horizontal ceiling units.
<b>COIMA USA</b>	Dust and Paint collection systems (including devices and ducting systems).
<b>CONDAIR</b>	Complete line of humidification equipment including electric, gas, steam and adiabatic cooling systems (formerly Nortec).
<b>DAIKIN APPLIED</b>	Complete line of commercial HVAC products from 3-2700 tons including rooftop systems, water source heat pumps, custom air handling units and water chillers.

**OUR PRODUCTS**

Air Reps has unparalleled access to many of the world’s leading HVAC manufacturers and their unique technologies.

As a result, we have the rare ability to investigate several scenarios during the early design phase of a project. This collaborative process may involve visits to our manufacturers’ factories or on-site design meetings to collectively develop the optimum solution.

## OREGON

<b>DAIKIN AIR COMFORT</b>	Variable Refrigerant Volume systems available for air and water-cooled applications, unified heat recovery or heat pump condensing units with inverter compressors with duct free and ducted fan coil options. Complete line of mini-split systems.
<b>DANFOSS</b>	Variable speed drives designed specifically for HVAC, fan and pump motor applications.
<b>DYNAMIC AIR</b>	High-efficiency filtration utilizing non-ionizing, polarized media.
<b>EASYWATER</b>	Low chemical and NO chemical water treatment solutions for all water system types including: domestic hot water, closed loop heating and cooling water, open loop condenser water systems, sediment collection, softeners, and Reverse Osmosis.
<b>ECOCHILLERS</b>	Specializes in efficient air-cooled chiller and air source heat pumps in sizes ranging from 50 to 500 tons.
<b>EPIC FANS</b>	High volume, low speed area ceiling fans.
<b>FLOW CONTROL INDUSTRIES</b>	High performance pressure-independent control valves ranging from ½" to 8".
<b>GOVERNAIR</b>	Custom air handlers and DX refrigeration utilizing evaporative, air and water-cooled condensing ranging from 60 to 1000 tons.
<b>HAYS</b>	Valves and valve kits.
<b>HUNTAIR</b>	Custom air handlers that incorporate Fanwall Technology for greater flexibility and increased fan efficiencies.
<b>IAC ACOUSTICS</b>	Sound attenuation devices for commercial and industrial industries.
<b>ISO-AIRE</b>	Mobile recirculation and filtration units utilizing HEPA filters and UV light for use in healthcare, government, and education settings.
<b>JAGA</b>	Trench heating and cooling, convectors, and fan coils.
<b>KELVION</b>	Plate, shell and tube, finned tub and refrigeration heat exchangers and modular cooling towers.
<b>LAKOS</b>	Centrifugal separators, sand filters and water filtration systems.
<b>MAMMOTH</b>	Custom rooftop heating and AC units up to 1200 tons with air, water and evaporative-cooled condensing.
<b>MODINE</b>	Gas fired, steam and electric make-up air and heating equipment.
<b>NAILOR INDUSTRIES</b>	VAV, fan-powered, and induction boxes, horizontal and vertical fan coils, fire, smoke, and air control dampers, louvers, grills, grates, and diffusers.
<b>NELSON HEAT TRACE</b>	Tailored cable systems for maintenance and freeze protection.
<b>NUCLIMATE</b>	Energy efficient chilled beams and pool dehumidification units.
<b>NUTECH</b>	Complete automatic and manual balancing valves for hydronic heating and chilled water applications.

## OREGON

<b>OXYGEN8</b>	Indoor low profile DOAS solutions.
<b>PARAGON CONTROLS</b>	Complete line of outside air measurement stations in addition to flow, pressure transducers, indication meters and calibration tools.
<b>PERMALERT</b>	Leak detection location systems that help keep mission critical facilities and production on-line.
<b>PHOENIX CONTROLS</b>	Sound airflow and pressurization control systems for critical environments.
<b>PHP SYSTEMS</b>	Pipe support systems and VRV equipment supports.
<b>POOLPAK</b>	Pool ventilation and heat recovery systems designed to control pool water temperature and space comfort conditions.
<b>POTTORFF</b>	Louvers, air control dampers, backdraft dampers, UL Rated, Fire Smoke and Smoke Damper.
<b>Q-PAC</b>	ECM fan array solution for custom air handlers and retrofit applications.
<b>QMARK</b>	Air Circulators and baseboard, unit, portable, and wall heaters.
<b>RAE COILS</b>	Standard and custom coils including hot and chilled water, steam, dx, and heat pump. Run-around loop solutions too.
<b>RENEWAIRE</b>	Packaged ventilation, energy recovery and dedicated outdoor air units.
<b>RUNTAL RADIATOR</b>	Hydronic and electric radiant heaters for residential tower, commercial and industrial use.
<b>SUPERIOR RADIANT HEATERS</b>	Gas & electric radiant heater.
<b>SYSTECON</b>	Factory assembled, modularized pump packages, central chilled water, and co-gen plants. Systecon will design and build central plant systems complete with chillers, cooling towers, boilers, piping, pumps and central plant controls.
<b>TAMCO</b>	Thermally insulated, maintenance free airfoil control, backdraft and multizone dampers.
<b>TECHNICAL SYSTEMS</b>	Standard and custom chilling and heat pump solutions. Air-to-water and DX splits. Chillers, Condensers, Condensing Units, and Fluid Coolers.
<b>TEMTRON</b>	Line of custom air handling units, fan coil units, and triple deck multi-zone units featuring FC, plenum fan and Fanwall Technology.
<b>THERMAL CORPORATION</b>	Custom air handling units, fan coils, air-cooled condensers, air columns and blower coils.
<b>TRANS-COIL</b>	Line reactors and protection for VFDs in commercial and industrial settings.
<b>TURNTIDE</b>	KPI-based building portfolio management system that allows for detailed trending and predictive maintenance. Riptide works with your existing control system providing alerts based on your predefined rules.
<b>TWIN CITY FAN</b>	Full-service ventilation products for light industrial applications including energy recovery units, make-up air systems, kitchen hoods, and SupremeFan supply and exhaust products.

<b>UNITED COOL AIR</b>	Full-service provider of custom HVAC systems utilizing the latest technologies.
<b>UV RESOURCES</b>	Full line of UV-C products for the HVACR industry.
<b>VENMAR</b>	Custom energy and heat recovery ventilators and integrated air handling units. Options include Fanwall Technology, enthalpy wheels, plate heat exchangers and heat pipe technology.
<b>VENTROL</b>	Comprehensive range of air handling solutions utilizing integrated frame construction, modular configurations or knock-down units for field assembly where required.

**BELLEVUE OFFICE**
